

dedicated to your park heritage. Or if you live in Oregon, consider a Crater Lake Centennial commemorative license tag for your car. Contributions to either of these programs will help fund an endowment to support this Center and its programs.

PARTNERS

The Crater Lake Science and Learning Center is operated in collaboration with the Oregon Institute of Technology and Southern Oregon University.

This Center was established in part from public entrance fees as well as generous donations from the following partners: Jeld-Wen Foundation and The Kinsman Foundation.

To lend your support to the important work of the Crater Lake Science and Learning Center, consider a contribution to the Crater Lake National Park Trust, a private non-profit

CRATER LAKE

NATIONAL PARK

SCIENCE AND
LEARNING
CENTER

WELCOME

Crater Lake National Park is one of America's oldest national parks and has been a source of public enjoyment and inspiration for over 100 years. While millions of Americans have gazed on the sublime beauty of Crater Lake, few realize that under this beautiful veneer lies an outstanding outdoor laboratory and classroom. It is a

place that draws scientists, teachers and students to investigate, instruct and learn from and about our natural world.

From scenery

to science and education, the Park's value to society is expanding.

CRATER LAKE

NATIONAL PARK

The Science and Learning Center was born from the collective vision of the Park and its partners to establish Crater Lake National Park as a wellspring for research information, a proving ground for educational techniques and a source of inspiration for artistic expression.

This facility is for you: the scientist, teacher, student and artist. We welcome you here to lend your talent, share your discoveries, and teach and learn the lessons that will inspire the next generation to explore deeper, learn more and enrich us all.

*"This facility is for you:
the scientist, teacher,
student and artist."*

OUR MISSION

The Crater Lake Science and Learning Center provides research and educational opportunities to promote the understanding, appreciation and stewardship of our Nation's natural and cultural heritage. The focus of the Center is to:

- Support high quality investigations;
- Translate scientific information and;
- Incorporate research information into park planning and management and educational programs.

FACILITIES

We offer a wide variety of facilities and support to visiting scientists, educators, artists and students including:

- Office space
- Overnight accommodations for seven
- Workshop and meeting facilities
- Reference libraries
- Museum collections
- Laboratories
- GIS and GPS support services
- Computer and Internet access
- Dedicated research vessels
- Logistical support
- Field equipment
